linkedin.com/in/wael-fezari    github.com/wauul    wael-fezari.vercel.app

Full-stack developer specializing in AI / ML, with two AI-focused degrees. I build business assistants, RAG pipelines and Python agents, from API integration to evaluation. My experience combines two years as an apprentice at ROKI, freelance delivery and personal projects in generative AI and computer vision.

### SKILLS

**Full-stack** - Python, TypeScript / JavaScript, React / Next.js, Node.js, FastAPI / Flask, API integrations.

**LLM & RAG** - LangChain, LangGraph, Azure OpenAI / AI Search, Groq, embeddings, reranking, structured outputs / Pydantic.

**Databases** - SQL, PostgreSQL, pgvector, Prisma.

**DevOps & cloud** - Git, Docker, GitHub Actions, Azure, Cloudflare, Vercel.

**Machine learning & vision** - PyTorch, scikit-learn, TensorFlow / Keras, CNNs, transfer learning.

**Evaluation & monitoring** - Ragas, Langfuse, Sentry, OpenTelemetry, Grafana.

### SELECTED AI PROJECTS

**Ragbench** - Built a RAG lab to compare embeddings and reranking, evaluate answers with Ragas and inspect LangGraph workflows through Langfuse.

**PatchGoblin** - Built a CI repair agent: diagnosis, bounded patches, Docker sandbox tests and pull requests for human review.

**QueryOtter** - Built a PostgreSQL investigation agent with FastAPI and LangGraph: execution plans, rewrites and checks before recommendations.

**Zoidberg-AI** - Compared chest X-ray classifiers using CNNs, VGG16 transfer learning and confusion matrices with TensorFlow / Keras.

### PROFESSIONAL EXPERIENCE

#### Full-stack developer

Freelance | 2024 - present

- Built an AI planning assistant that turns briefs into draft tasks and proposes revised schedules considering dependencies, leave and team capacity through Lucca.
- Built email-to-workflow automation: extracting requests and dates, preparing document updates and drafting replies for user review through Microsoft APIs.

#### Full-stack developer

ROKI, Marseille | Apprenticeship | Sept. 2022 - Aug. 2024

- Built a RAG knowledge assistant with Azure OpenAI and Azure AI Search: source-grounded answers, onboarding checklists and flags for missing or conflicting information.
- Developed a Python / Flask job-posting distribution module on Azure and API integrations for Node.js / PostgreSQL business services.

#### Independent developer

Fiverr | 2016 - 2021

- Delivered React / Angular web apps, Flutter mobile apps and Java desktop software alongside my studies.

### EDUCATION

**MSc Pro, Epitech** - Marseille | 2022 - 2024 | AI specialization, master's-level qualification / RNCP level 7.

**Master's in Information Systems & Decision Support** - Badji Mokhtar University, Annaba | 2019 - 2021. Thesis: recommendations for student mental health.

### LANGUAGES

French and English: fluent | Arabic: native
